INFORMATION DISCLOSURE STATEMENT

The Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir,

Attached please find a PTO/SB/08 and document copies for the above referenced patent application. A check in the amount of \$180 is submitted herewith to cover the fee required by 37 CFR 1.17(p).

The IDS relates to a license agreement which applicant entered into with an Iowa company on or before about 24 July 2002. The license related to the product now described in United States Patent 6,713,765 and in United States Published Patent Application 2003/0168602. Applicant asserts that at no time did any payments or tangible compensation change hands between the parties, and at

no time did the physical possession of any prototypes change hands, though private demonstrations for the benefit of the licensee by the applicant were conducted at the time of the license. No sales or offers for sale of any product have been made to the best of the applicant's knowledge, and by the wording of the license, the contract was terminated after the two year term and the one year wind down period.

Applicant asserts that this license is not and does not evidence prior art under any section of 35 U.S.C. 102, as has been decided by the C.A.F.C. in numerous cases including *Moleculon Research Corp. v. CBS, Inc.*, 793 F.2d 1261, 1267, 229 USPQ 805, 809 (Fed. Cir. 1986) (holding that an assignment of rights in an invention in exchange for a share of any proceeds from commercialization did not invalidate claims at issue because "an assignment or sale of the rights in the invention and potential patent rights is not a sale of 'the invention' within the meaning of section 102(b)") and as described in the M.P.E.P. at Section 2133.03(b)(I)(D) (A Sale of Rights Is Not a Sale of the Invention and Will Not in Itself Bar a Patent). However, applicant submits a copy of the License to fulfill his duty of candor.

Respectfully Submitted,  
for Applicant
